Executive summary for management — all CVE scan

Generated: 2026-11-05T17:50:24Z
Source: tenable_vm — https://cloud.tenable.com (live=True)
Scope: 61 CVE runs — 56 discovered from PHP/Node.js plugin findings plus 5 added high-profile CVEs
Safety: read-only; no ticket, containment, patch, or restore executed.

Bottom line

61 CVEs were processed with 0 errors. 2 had no Tenable plugin match; 59 stopped at the ticket gate. 22 unique assets were returned; 0 of 80 asset plans had a verified target version.

Numbers at a glance

Metric	Value
CVEs run	61
Runs with errors	0
No-exposure runs	2
Runs awaiting ticket approval	59
Unique assets	22
Asset appearances	80
Asset max tiers critical / high / medium / low / unknown	22 / 0 / 0 / 0 / 0
KRI detected / clear / unknown / n/a	153 / 8 / 559 / 0
Plan paths patch / compensate / isolate	80 / 0 / 0
Asset plans with a verified target version	0
Containment candidates	56
Containment isolated / blocked / failed / restored	0 / 0 / 0 / 0
Patch jobs submitted / skipped	0 / 0
Verification remediated / still affected / unknown	0 / 0 / 0
Infection status counts	not_run=61
Approval gates recorded	0
Explicit unknown fields	1023
Evidence manifests verified	61/61

Insights

Largest asset concentrations

Asset	CVEs	Max KRI	Tier
win11	41	85.5	critical
rhel9	16	87.1	critical
dc1	2	92.7	critical
pa-820.lab.tenablesecurity.com	2	88.2	critical

Asset	CVEs	Max KRI	Tier
sql2016	2	84.7	critical
oraclelinux8.target.tenablesecurity.com	1	89.9	critical
rhel8	1	87.1	critical
HYPERVDC	1	86.8	critical

- **No target versions:** the batch produced 0 targets. Patch submission would skip every job until package/runtime versions are enriched.
- **Control confidence:** KRI-02/03/04/06/07 are unknown on every asset; agent inventory is out of scope and no EDR/AV inventory was supplied.
- **Scope is broader than Node.js:** CVE-2026-111497 matched OS Brotli packages across 15 assets, not only the Node.js host.
- **Scanner mapping needs review:** the PHP CVEs also matched a PAN-OS plugin; verify the CVE/plugin association.
- **Discovery is capped:** the workbench query returned the requested 5,000-entry limit; paginate before calling the list exhaustive.

Decisions required

1. Fix runtime/package version enrichment before approving any patch gate.
2. Supply an asset inventory/control connector to reduce unknown KRIs.
3. Review the PAN-OS PHP mapping and the 15-asset Brotli scope.
4. Select a pilot asset and approve ticket → containment → patch → verification with a named approver.

Evidence

- `reports/Phase-Validation-For-All-CVE.md` — per-CVE and phase detail
- `reports/Phase-Validation-For-All-CVE.json` — machine-readable results
- `reports/Executive-Summary-For-All-CVE.md` / `.html` / `.pdf` — this summary
- `runs/<run-id>/executive-summary.md` — one management summary per run
